VIKING FIRE PROTECTION INC. is a subsidiary of Polygon Security Inc., an entirely Canadian private holding company specializing mainly in the fields of fire protection and detection. VIKING is one of the oldest and most respected enterprises of its kind in Canada, with offices in 14 cities across the country. Since 1930, VIKING has built a solid reputation in the fire protection field via the result of its dedication to providing products and services that meet its clients’ specific needs.

With the support of Polygon Fire Protection Inc., its international subsidiary, our enterprise now exports its knowledge to many countries around the globe. From fixed-price contracts to turn-key solutions, whether consisting of industrial, commercial or residential applications, new or existing buildings, we offer maximum protection for each project undertaken and take great pride in all the contracts we carry out.

CONVENTIONAL AUTOMATIC FIRE SUPPRESSION

Protect your investment and control risks

VIKING’s strength stems from a solid engineering team of experts that uses the latest technological developments and equipment to deal with the complex standards governing fire protection. Our experts work with the most advanced engineering software, generating accurate results. Accompanied by experienced project managers and trade certified installers, our multidisciplinary team is able to guarantee excellent results in design, manufacturing and installation of the suppression systems. Whether an existing or new building, your property will be appropriately protected with wet, dry, deluge or preaction sprinkler systems, in accordance with your specific needs.

Since 1995, our Montreal team has maintained a quality management system adapted to its clients’ needs by working under ISO 9001’s rigorous standards.

ALARMS, INSPECTION AND MAINTENANCE

The starting point for effective protection

A highly efficient fire detection system can prevent the worst possible situation. VIKING provides sophisticated systems of addressable and conventional detectors, controls panels as well as a large assortment of specialized fire alarm equipment.*

VIKING also provides inspection for all types of fire protection systems and products: sprinkler systems, fire alarm systems, fire pumps, fire extinguishers, special hazard systems and emergency lights. In our installations, VIKING uses only high quality products manufactured by the largest manufacturers of fire protection equipment. Whether you need design, installation, inspection or maintenance of fire protection systems, VIKING is the name that you can trust.

VIKING is well known for its exceptional expertise in special hazard technologies. Its team of experts ensures precise identification of risks and supplies systems that will ensure the best protection possible.

Special hazard systems are strongly recommended for protection of highly flammable solids, liquids and gases. Here are the principal and special hazard products offered by VIKING:

- Low, medium and high expansion foam systems
- Cycling systems and integrated systems:
  - TotalPac®2 Integrated Sprinkler Systems
  - ICAF® Integrated Compressed Air Foam Systems
  - FireFlex DUAL® and 1230® Integrated Clean Agent Systems
- Active detection systems (very early smoke detection systems) and passive detection using heat, smoke and flame detectors
- Toxic and combustible gas detection systems
- Firetrace systems for micro-environments
- Dry chemical extinguishing systems, CO2 systems...

VIKING is also proud to offer clean fire protection systems intended to safeguard lives and properties, which at the same time do not harm the environment.

- Novec 1230
- Inert gases: Argon, Argonite
- Water mist: High and low pressure systems
